### **Part III DETAILED ACTION**

#### ***Notice to Applicant(s)***

1. This action is responsive to the following communications: RCE filed on 8/30/05.
2. This application has been reconsidered. Claims 1-13 and 18-28 are pending.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27 and 28, are rejected under 35 U.S.C. 102(e) as being anticipated by Aoki (U.S. 6,631,008).

With respect to claims 1, 2, 3, 4, 6, 9, 18, 19, 23, 24, and 28, Aoki discloses a system for processing a print job of a user comprising a print processing registry (30) configured to have print processing services of a plurality of discrete print processing providers registered therein

Art Unit: 2626

(column 8, lines 29-44), the print processing providers including a print job storage provider (column 10, lines 12-26); a print job processing provider (the other server) (column 6, lines 40-48); a print job print provider (the printer) (40), and a print job delivery provider (column 6, line 55 to column 7, line 4), and the print processing services including a storage capability of a print job storage provider to store a data file for the print job (which reads on the load of the printer) (column 12, lines 18-30); a processing capability of a print job processing provider to process the data file for the print job (column 8, lines 28-44); a printing capability of a print job print provider registered therein (column 8, lines 13-28), and a delivery capability of a print job delivery provider to deliver a completed print job to the user (which reads on determining the printing delay time) (column 8, lines 57-65), and means for receiving a print request for the print job from the user via a communication network (12) and processing and distributing the print job to the print provider (column 8, lines 5-28).

With regard to claims 5, 11, 12, 20, and 21, Aoki discloses the register (30) registers the storage capacity of the print provider (column 9, lines 27-37), and a storage provider identifier (column 8, lines 29-44).

With respect to claims 7, 8, 10, 13, and 22, Aoki discloses the printing capability includes printing quality capabilities (column 8, lines 57-65) and printer ID information (column 8, lines 37-44), and delivery capability (printing delay time) (column 8, lines 57-65), .

With respect to claims 25, 26, and 27, Aoki discloses storing, processing and printing the print job (column 8, lines 5-27).
